ATTENTION VISITORS
Help us keep your loved ones safe in the hospital.

CORONAVIRUS (COVID-19)

If you are experiencing any of the symptoms below, please avoid visiting at this time.

FEVER
HEADACHE
SORE THROAT

BODY ACHES
CHILLS
COUGH

TIREDNESS
RUNNY NOSE

If you must visit, please go to the information desk for a mask.

- Patients in the hospital are at a higher risk of infection.
- Patients and visitors, especially children under 12, can spread illness to patients and the staff who care for them.
- Whether you are experiencing symptoms or not, you should wash your hands often. Hand washing is the most important step in preventing the spread of germs and infection.

For any questions, please ask a care team member.
